Credit Name: CSE3130 Object Oriented Programming 2

Assignment Name: UEmployee

How has your program changed from planning to coding to now? Please explain?

This sounds like a joke but it is not.

My code has not changed at all. Given that I didn't fully understand the instructions, I just started putting together a shell to add functionality to later. After building this shell I realized that it fit the criteria in the textbook.

I was certain that the program had to be more complex, so I checked and it did not.

I don't really know what I can reflect on. The program was not particularly interesting or complicated, and was mostly tedious due to the fact that most of the work was creating and commenting get/set methods.

This reflection and error log are clearly inadequate but I really have nothing else I can say, I apologize.
